Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<div class="bullet first selected">` is close to 1 other tap targets final.
- The tap target `<div class="bullet">` and 1 others are close to other tap targets final.
- The tap target `<div class="bullet last">` is close to 1 other tap targets final.
- The tap target `خرید شاهین ایکس ال جی` is close to 1 other tap targets final.
- The tap target `مشاهده` is close to 1 other tap targets final.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
