## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 16% of the final above-the-fold content could be rendered with the full HTML response snapshot:15.

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 41.3KiB (65% reduction).

- Compressing <http://stats.aradpart.com/piwik.js> could save 40.6KiB (65% reduction).

## Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 288B (17% reduction).

- Minifying <http://snowa.ir/wp-content/plugins/variation-swatches-for-woocommerce/assets/js/frontend.js?ver=20160615> could save 173B (24% reduction) after compression.
- Minifying <http://snowa.ir/wp-content/plugins/woocommerce/assets/js/js-cookie/js.cookie.min.js?ver=2.1.4> could save 115B (12% reduction) after compression.

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it

directly in the HTML response.

- Only about 5% of the final above-the-fold content could be rendered with the full HTML response snapshot:15.
